EXECUTIVE PROFILE

Systems architect engineering leader with 15+ years across banking, payments, private lending, data platforms, and operational automation. Hands-on builder of AI-enabled tools, agent-first workflows, data pipelines, and self-service business applications. Strong partner to leadership, operations, sales, compliance, and technical teams, with a track record of turning ambiguous operational problems into scalable systems.

TECHNICAL CORE

AI Platform & Agent Tooling: Agent-first workflows, reusable internal tools, AI enablement, rapid prototyping.

Financial Services Platforms: Private lending, banking, payments, onboarding, reporting, servicing workflows.

Product Leadership: Cross-functional delivery, stakeholder alignment, vendor governance, team enablement.

Data & Integration Architecture: ETL pipelines, data warehouse design, APIs, CRM and LOS integrations.

PROFESSIONAL EXPERIENCE

VASTER

Miami, FL

Product, Platform & Automation Lead (Senior Staff Level)

Sep 2021 - Present

- **Scaled AI-enabled operations:** Built and continuously improved internal agent-first tooling and cross-platform AI workflows across lending, investor reporting, and servicing operations, reducing manual review effort and improving team throughput across multiple business functions.
- **Modernized lending infrastructure:** Replaced manual loan applications with multi-step digital onboarding and approval-to-origination workflows, integrating CRM, LOS, reporting, and servicing systems to accelerate deal processing and improve operational visibility.
- **Owned investment fund operations:** Oversaw operations for a \$55M AUM investment fund with 30+ investors, leading investor onboarding, reporting, compliance coordination, and collaboration with accounting and executive leadership.
- **Ensured production resilience:** Managed business-critical servicing workflows, data pipelines, and integrations during platform scaling, maintaining high availability and zero-disruption operations.

GRUPO MEZERHANE

Miami, FL

Lead Systems Architect

Feb 2016 - Aug 2021

- **Launched multi-partner fintech platform:** Led technical strategy and launch of PayCol, a payment platform built with Mastercard and Novopayment, integrating legacy financial institutions with modern fintech APIs.
- **Reduced operational overhead through modernization:** Orchestrated the migration of core banking systems to cloud-based managed solutions, improving system performance, reducing latency, and simplifying infrastructure operations.
- **Advised group-wide digital strategy:** Directed digital initiatives across banking, payments, media, and technology investments, guiding senior management on vendor selection, platform architecture, and technology investment decisions.

MIPLATA COMPAÑÍA DE FINANCIAMIENTO S.A.

Bogotá, Colombia

Software Engineer (Novel mobile payments startup)

Nov 2009 - Aug 2014

- **Built high-volume mobile financing platform:** Led development of a mobile credit platform in partnership with Brightstar, supporting large-scale credit product transactions for the Colombian market.
- **Supported product and business growth:** Partnered with operations, finance, and commercial teams to translate mobile financing requirements into scalable systems for reporting, transaction processing, and product expansion.

EDUCATION

IE Business School - International MBA, 2015

Madrid, Spain

Winner, Mutua Madrid Innovation Challenge; peer-selected team champion

Universidad Metropolitana - B.S., Systems Engineering, 2009

Caracas, Venezuela
